

Catalyst Paper - Elk Falls - PM 1&2 Crane Demolition and Installation Project

Sector: Pulp and Paper
Location: Elk Falls, Campbell River
Owner: Catalyst Paper
Completion: May 2005
Consultant: J.R. MacKenzie Engineering

Project Highlights:

Brymark's expertise was called on to demolish the obsolete Paper Machine #1 & #2 Machine Room 60 ton overhead crane and replace it with Konecranes newest 60 ton model. Project requirements were not to disrupt operations. The work involved lead abatement, extensive planning for rigging & lifting the equipment in and out of the building. The new crane was brought in through the side of the building instead of the traditional roof removal installation. The project was delivered incident free with no interruptions to operations.
