

Canexus Chemicals - North Vancouver - Effluent Tank Demolition Project

Sector: Oil, Gas & Chemical Refining
Location: North Vancouver, BC
Owner: Canexus Corporation
Completion: October 2011

Project Highlights:

Brymark's expertise for planning & rigging was called upon to demolish Canexus Chemical's decommissioned effluent tank. This tank was located in a very congested area of the plant. Lead abatement and sequenced torch cutting was required to reduce tank component weights to within available crane lift capacity. Brymark provided the concrete foundation modifications along with lifting and rigging services for the installation of the new FRP replacement tank. The project was delivered incident free and without operational interruptions.
