

## Polaris Minerals - Port McNeill - Aggregate Stacking Conveyor Repair Project

**Sector:** Mining - Sand and Gravel Processing.  
**Location:** Port McNeill, BC  
**Owner:** Polaris Minerals Corporation  
**Duration:** 2 Weeks – 5 day Shutdown  
**Completion:** June 2011  
**Consultant:** J.R. MacKenzie Engineering

### Project Highlights:

Summer 2011 gravel Polaris Minerals called on Brymark for some help with the CV-08 aggregate stacking conveyor at their Orca Sand and Gravel Site. The conveyor was in danger of structural failure. Brymark and J.R. MacKenzie Engineering formulated a plan and process to repair the conveyor back to design configuration. Detailed upfront planning of the complicated repairs and preparation enabled the shutdown repairs to be completed successfully incident free, several shifts early.
