

Air Products Canada - Burnaby BC - Process R&D Lab Expansion Project

Sector: Oil, Gas & Chemical Refining
Location: Burnaby BC
Owner: Air Products Canada Inc
Duration: 3 months
Completion: May 2015

Project Highlights:

After concerns about other contractors abilities, Brymark was called to execute the mechanical portion of this Process Gas R&D Lab. The challenges overcome were the field routing and orbital welding of banks of stainless steel process gas tubing. Through innovative material selections and routing options we were able to complete the project on schedule and budget while maintaining the cleanliness standards required in a lab environment.
