

**BRYMARK**

## Catalyst Paper - G13 Turbine Installation Project - Piping Fabrication

**Sector:** Piping, Skid & Module Fabrication  
**Location:** Brymark's Fabrication Facility  
**Owner:** Catalyst Paper  
**Duration:** 2 months  
**Completion:** June 2015  
**Consultant:** Amec Foster Wheeler

### Project Highlights:

Early in 2015 Brymark provided supply and shop fabrication services for the G-13 carbon steel piping requirements. The piping was fabricated for the Steam, Vacuum Steam and Condensate systems to tie in the Catalyst Paper G-13 Turbine to the mill systems. Our shop worked closely with the field to fabricate the largest assemblies possible to reduce field installation hours.
